Project Overview:

JD Power - Auto Data (Merger & Acquisition):

Overview: J.D. Power, a data analytics and consumer intelligence company, has acquired Auto data Solutions to offer market-leading consumer analytics to the automotive industry. Deloitte provided an IPAAS solution to streamline the Quote to Cash process for this New-Co.

Responsibilities:

- Actively participated in multiple workshops and captured the requirements in the design and discovery phase.
- Developed Account, contact, products and Sales Order integration between Salesforce and NetSuite.
- Enhanced the existing Account receivable process between Bank SFTP and NetSuite for an effective Cash App process.
- Prepared technical design documents and UML diagrams.
- Performed thorough Unit test, FUT, SIT UAT & had provided warranty support postproduction.

Exelon Corp:

Overview: Exelon Corporation is the United states leading competitive energy provider. Storms in June 2020 created stress in their systems and the critical problem identified were high availability and multiple failure points. Deloitte had provided a stable ecosystem to host Exelon customer facing applications and rebuilt the integrations with self-healing capability.

Responsibilities:

- Developed Real-time interfaces to orchestrate power outage details received from customer via web/mobile app.
- Developed a Out of Box Circuit breaker solution to make the integration self-healing and decrease the stress on the physical resources.
- Created a common utility error handling framework to log the exception to Azure Log Analytics.
- Developed a unit test automation utility in postman-Newman application.

GE HealthCare:

Overview: The company provides medical imaging and information technologies, medical diagnostics, patient monitoring systems, drug discovery, bio pharmaceutical manufacturing technologies.

Responsibilities:

- Gathered and captured the requirements from business.
- Developed multiple interfaces like payment, delivery tracking, file transfer and made enhancements in existing interfaces as per requirement.
- Enhanced a high-volume interface with memory optimization techniques which increased the performance by 60%.
- Created CAD and Design Document based on the requirements.
- Provided effective trouble shooting analysis on production issues and applied hot fixes.

Organizational Scan:

- Working as Software Engineer in Deloitte Consulting USI from Sept-2020 to till date.
- Worked as Software Engineer in Tech Mahindra from April-2018 to July-2020.

Academic Credentials:

- B.tech in CE, BVRIT-JNTUH-2017 70%
- Intermediate (MPC), NRI Academy-BOI, A.P, Hyderabad-2013 92%
- 10th, St Martins High School-ICSE, Hyderabad – 2011 76%
